In Campus Training Programme on ALM and Stress Testing for Co-operative Banks and RRBs

(24 to 26 July 2024)

Introduction: Asset Liability Management lies at the core of effective banking business and is a powerful tool to address Liquidity Risk and Market Risk faced by a bank at all times. Development of risk management systems in banks has made 'stress testing' an important tool in the overall governance, risk management and capital planning infrastructure of the bank. Stress tests are forward-looking exercises that aim to evaluate the impact of severe but plausible adverse scenarios on the resilience of banks. It complements a bank's other quantitative risk management tools by providing insights into its risk profile and alerting management to vulnerabilities in the case of exceptional events. This training program aims to address the skill gap in Co-operative Banks and RRBs to use ALM and Stress Testing as an effective tool for Risk Management.
