BY NABARD**

# **In Campus Training Programme on Risk Intelligence for Banks: Managing Credit, Market, Operational & Fraud Risks Effectively**

**(14 to 16 October 2026)**

## **Introduction:**

Risk management in banking entails systematic processes employed by banks in identifying, assessing, and mitigating various risks, such as credit, market, operational, and compliance risks inherent in their operational and investment decisions. The Basel Framework requires banking professionals to have a detailed understanding of various kinds of risks faced by the bank and deal with them in diverse circumstances. The successful transition of NABARD Supervisory process from CAMELSC to Enhanced CAMELSC and eventually to Risk Based Supervision rests on the capacity of Banks to adopt these principles in practice.

“The present program aims to build the capacity of bank officers in developing conceptual clarity and maturity in formulation and implementation of Risk Management practices in banks and transform them into “Risk Intelligent Organizations”. A Risk Intelligent organization is characterized by Risk discussion embedded in strategic planning, capital allocation, product development, etc. linking them to performance measures and use of Industry benchmarking.

**Objectives:** At the end of the programme, the participants will be able to:

- ❖ Equip with tools and techniques for managing credit, market, operational, and fraud risks.
- ❖ Understand ECAMELSC, risk-based supervision and governance frameworks.
- ❖ Strengthen compliance with Statutory & Regulatory guidelines.
- ❖ Explore technology-driven solutions for risk mitigation.
